Skills

ES6 Javascript • Handlebars.js • HTML • CSS • API • Node.js • MYSQL • dotenv • Sequelize • Insomnia • Inquirer • Console.table • JEST • Moment.js • Uniqid • Bootstrap • Sequelize • PostGres

Applied Projects

Git A Job (HTML, CSS, ES6 JavaScript, API, Sequelize, Postgres) – Worked on a collaborative project where the goal was to make a website that would allow the user to have their choices for the evening made for them.

EAT DRINK RELAX (HTML, CSS, ES6 JavaScript, API) – Worked on a collaborative project where the goal was to make a website that would allow the user to have their choices for the evening made for them. Dinner, a drink, and a movie would be randomized at the click of a button. I was in charge of the logic side for the randomization of the movie using TMDB (The Movie Database) API.

TECH BLOG – (Handlebars.js, Node.js, Sequelize, MYSQL, ES6 Javascript, Express, dotenv) – Fake tech blog running on a server built with express and handlebars.js for the views.

E-Commerce Back End – (MYSQL, ES6 Javascript, Sequelize, dotenv, Insomnia) – Created the back end for an ecommerce website allowing the user to update items as they please.

Employee Tracker – (MYSQL, Inquirer, Node, Console.Table, ES6 Javascript) – Allows the user to track employees, their salary, what department they work for and their role.

Team Profile Generator – (Node.js, ES6 Javascript, Inquirer, JEST) – Application used to create a team profile website via the command line. After questions are answered in the command line, an html page is generated.

Workday Scheduler – (HTML, CSS, ES6 Javascript, JQuery, Moment.js, Bootstrap) – Website that allows the user to schedule their weekday. Sections will change color based on how close they are in time.

Note Taker – (Node.js, Express.js, Uniqid, ES6 Javascript, CSS) – Note taking app using express.js. Allows users to take notes wherever they are, on any device.

README Generator – (ES6 Javascript, Inquirer) – Allows the user to create a professional README file for Github based off a series of questions through the command line.

Weather Dashboard – (HTML, CSS, ES6 Javascript, JQuery, Bootstrap, Axios, Node.js) – A basic weather dashboard that allows the user to input a city and be shown the weather for that city.

Password Generator – (HTML, CSS, ES6 Javascript) – Application that allows the user to generate a random password based off chosen parameters (UPPER, LOWER, NUMBERS, and SPECIAL characters.)

Experience

APRIL 2021 - PRESENT

Market Manager, Microsoft/Premium Retail Services – Mississauga, ON

As a market manager for Microsoft with Premium Retail Services, I am the face of Microsoft within my territory of about 60 stores. I travel between numerous different Best Buy, Staples, Costco, Walmart, and Game Stops, increasing sales year over year of about 5% - 15% depending on the store.

SEPT 2017 – APRIL 2021

Microsoft Senior Advisor/Best Buy Canada – Kitchener, ON

Started out full time selling computers, moved on to selling phones with all different carriers, and ended off my time with the company as a Senior Advisor with Microsoft. Helped lead a team of 24 people.

Education

OCT 2022

UNIVERSITY OF TORONTO – Coding Bootcamp / Market Driven Full Stack Developer
